Technical Skills

Languages: TypeScript, JavaScript, Python, PHP, SQL, C, C++

Frontend & Mobile: React, Next.js (App Router), React Native, Expo, Tailwind CSS, HTML5/CSS3

Backend & AI: Node.js, Express.js, FastAPI, Groq API, RESTful APIs, GraphQL, WebSockets

Databases & DevOps: PostgreSQL, MongoDB (Mongoose), MySQL, Redis, Docker, Vercel, Render, Git, Vitest

Security & Auth: Clerk, JWT, OAuth 2.0, bcrypt, Role-Based Access Control (RBAC), Middleware Authorization

Experience

Full Stack Developer Intern

ASSORS Morocco

Jul 2026 – Present

Casablanca-Settat, Morocco

- Designed a 35+ entity relational schema and built end-to-end document pipelines spanning Procurement and Order-to-Cash, including automated 3-way invoice matching and a line-level Moroccan VAT engine (0–20%).
- Built an AI-driven ATS screening queue on PostgreSQL row-level locks (SKIP LOCKED) with stale-claim reclamation and exponential backoff, eliminating race conditions between concurrent scheduled and manual processing.
- Secured 50+ REST API route handlers with dual-layer authorization (edge session middleware plus per-handler database role checks), validated by 16+ unit and integration test files in Vitest.

Freelance Full Stack Developer

BIG HOUSE MARKETING

Feb 2026 – May 2026

Luxembourg (Remote)

- Delivered and maintained three responsive client applications (Xperia Agency, Moonroom, Frère la Daronne) on the MERN stack and WordPress, improving organic search traffic through technical SEO and structured data.
- Optimized asset delivery and rendering pipelines to raise Core Web Vitals scores and cut page load times across client platforms.

Full Stack Developer Intern

TeamElGhazi

Jun 2025 – Aug 2025

Casablanca, Morocco

- Built a full-stack e-commerce storefront in React and Next.js with product listings, dynamic search/filtering, persistent cart state, and a multi-step checkout workflow.
- Engineered a RESTful Node.js/Express API with MongoDB for inventory management, order status tracking, and full user authentication (JWT, bcrypt, email verification, RBAC).
- Integrated OAuth providers and third-party payment gateways, and created a reusable Tailwind CSS component library; containerized backend services with Docker for automated Vercel/Render CI/CD deployments.

Key Technical Projects

Resume AI | Next.js, Express, Groq API, MongoDB, NextAuth, Tailwind CSS

2026

- Built an AI-powered resume builder and mock interviewer that streams low-latency LLM evaluations via the Groq API.
- Built a server-side LaTeX/Vector PDF compilation engine that converts dynamic AI outputs into downloadable PDF resumes.

Airport Carpooling App | React Native (Expo), Node.js, MongoDB, Stripe Connect, Redis

2026

- Developed a monorepo mobile ridesharing app with Stripe Connect Express payouts, Twilio SMS OTPs, and Cloudinary identity verification.
- Architected an idempotent Stripe webhook engine with atomic wallet transactions and background payout reconciliation schedulers.

Learnify | React, Node.js, Express, MongoDB, Docker, Postman

2026

- Built a containerized LMS with dedicated Student/Teacher dashboards, course sequencing, and automated quiz scoring.
- Deployed via Docker Compose and secured instructor endpoints with JWT bearer token middleware.

Fact Check | Chrome Extension Manifest V3, JavaScript, Node.js, Express

2026

- Built a Manifest V3 browser extension and Express REST API that captures on-page text and streams real-time claim verifications.

Education

Faculty of Sciences Rabat, Mohammed V University

Bachelor of Science in Applied Computer Science & Software Engineering

Rabat, Morocco

Class of 2026
