Technical Skills

Languages: JavaScript, Python, PHP, C, C++, SQL

Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, WebSockets

Databases: MongoDB, PostgreSQL, MySQL, Redis, Firebase

Cloud & DevOps: Docker, Railway, Render, Vercel, Linux, CI/CD

Security & AI: JWT, OAuth2, bcrypt, RSA, OpenSSL, Groq API, Whisper, Llama 3.3

Tools: Git, GitHub, Postman, VS Code

Projects

CovoitAir React Native, Node.js, MongoDB

- Built a cross-platform airport ride-sharing application using React Native and Express.js to streamline regional commuter matching workflows.
- Designed a multi-role JWT authentication layer and role-based access control (RBAC) to securely isolate passenger, driver, and admin scopes.
- Integrated Stripe payment elements and developed an administrative tracking dashboard for real-time ride verification and transaction history.

Live Audio Fact-Checking Extension Chrome Extension, Express.js, Groq AI

- Built a Chrome Extension to capture browser-level audio buffers for real-time stream transcription, handling chunked data payloads locally.
- Integrated Groq Whisper and Llama 3.3 pipelines to automate asynchronous claim extraction and output structured, validation-ready JSON data.
- Deployed a stateless Express.js backend on Railway, decoupling heavy LLM context processing to prevent blocking client extension execution.

Zodiac Guard Node.js, React, MongoDB

- Built a content moderation API and developer SDK designed for high-frequency automated spam, fraud, and harassment detection.
- Designed an API-key management layer featuring sliding-window rate limiting to guarantee structured fallback responses under a 150ms ceiling.
- Developed a React-based analytics dashboard providing security teams with data visualizations of live threats and immutable audit trails.

Learnify MERN Stack

- Built and deployed a full-stack e-learning web platform leveraging modular React functional components and an asynchronous Node.js backend.
- Designed optimized, indexed MongoDB schemas across interconnected collections to accelerate query execution during high-volume document reads.
- Developed REST endpoints managing complex application state logic for sequential course delivery, dynamic quizzes, and persistent progress tracking.

Experience

Big House Marketing Feb 2026 – May 2026

Freelance Full Stack Developer (Remote)

- Developed backend REST APIs and refactored legacy code structures, significantly improving system decoupling and eliminating redundant database round-trips.
- Built responsive client-facing web platforms using React, improving performance metrics by asset minification and optimizing Core Web Vitals.

Innovation Center Nov 2025 – Dec 2025

Coding & Robotics Instructor

- Designed a structured Python and Arduino curriculum, delivering practical lab instructions that transitioned students from code syntax to hardware interaction.

Team ElGhazi Jun 2025 – Aug 2025

Full Stack Developer Intern

- Developed modular web views using Next.js and Express.js, leveraging server-side rendering (SSR) strategies to eliminate layout shifts and speed up initial page paint.
- Built secure, session-managed authentication systems and converted Figma UI designs into responsive, production-ready Tailwind CSS templates.

Open Source

Mozilla Developer Network (MDN)

- Contributed technical content additions and documentation fixes to MDN Web Docs, updating public cross-browser JavaScript API reference material.
- Collaborated with project maintainers using standard GitHub forks, managing structured peer reviews, merge conflict resolutions, and clean branch rebases.

Education

Faculty of Sciences, Mohammed V University, Rabat Expected Jun 2026

Bachelor's Degree in Computer Science (Software Engineering)

Relevant Coursework: Operating Systems, Computer Networks, Databases, Software Engineering, Object-Oriented Design, Cryptography

Certifications

AWS S3 Basicss / JavaScript Algorithms and Data Structures / Responsive Web Design / Scientific Computing with Python
